

ACA Membership & Member Services Guide

Academic Commission of Academicians | aca.edu.ge

Welcome to ACA

ACA membership is designed for academics, doctoral graduates, researchers and future academic leaders who want a structured place to build their scholarly profile, publication plan, professional visibility and university connections.

Membership at a glance

The standard individual membership is USD 94 per month. Membership provides Academician Portal access, academic profile tools, publication planning resources, career guidance materials, opportunity matching resources and access to ACA member support.

What members can build

Members can organize a CV and academic dossier, track publications, prepare an associate-professor or professor pathway portfolio, review academic job opportunities, participate in research collaboration initiatives and use downloadable checklists and templates.

A supportive pathway

ACA is designed to make academic development easier to navigate. Members are encouraged to work step by step: establish a complete profile, map publications and experience, identify gaps, set measurable goals, and use the platform's guidance resources to advance.

Important academic note

Membership and internal portfolio benchmarks do not themselves confer an academic title or appointment. Formal academic titles and appointments remain subject to the rules, authority and evaluation procedures of the relevant issuing institution.

ACA guidance materials are designed for academic planning and dossier preparation. Formal institutional decisions remain with the competent institution.
